

## Rinconada Valley Groundwater Basin

- Groundwater Basin Number: 3-43
- County: San Luis Obispo
- Surface Area: 2,580 acres (4.0 square miles)

### Basin Boundaries and Hydrology

Rinconada Valley Groundwater Basin underlies Rinconada Valley in central San Luis Obispo County. This basin is bounded by Miocene age marine rocks and Mesozoic Franciscan Group rocks (Jennings 1958). The Rinconada Valley Groundwater Basin lies generally along the Nacimiento and Rinconada faults (Jennings 1958). The valley is drained by Rinconada Creek, a tributary to the Salinas River. Precipitation ranges from 20 to 24 inches per year.

### Hydrogeologic Information

#### ***Water Bearing Formations***

The principal water-bearing unit is Quaternary age alluvium.

#### ***Restrictive Structures***

The Rinconada and Nacimiento faults cross this basin, but it is not known whether or not these faults are groundwater barriers.

#### ***Recharge Areas***

No information is available.

#### ***Groundwater Level Trends***

No information is available.

#### ***Groundwater Storage***

**Groundwater Storage Capacity.** No information is available.

**Groundwater in Storage.** No information is available.

#### ***Groundwater Budget (Type C)***

No information is available.

#### ***Groundwater Quality***

**Characterization.** No information is available.

**Impairments.** No information is available.

### Well Production characteristics

Well yields (gal/min)		
Municipal/Irrigation	Range:	Average:
	Total depths (ft)	
Domestic	Range:	Average:
