

## Antelope Creek Groundwater Basin

- Groundwater Basin Number: 5-91
- County: Colusa
- Surface Area: 2,040 acres (3 square miles)

### Basin Boundary and Hydrology

The Antelope Creek Groundwater Basin is located east of Black Mountain in Antelope Valley. The basin consists of Quaternary alluvium and is bounded on all sides by Upper Cretaceous marine deposits. Several northeast trending faults may transect the valley (Jennings 1960). The basin is drained to the north by Antelope Creek. Annual precipitation is approximately 18 inches.

### Hydrogeologic Information

Hydrologic information was not available for the following:

***Water-Bearing Formations***

***Groundwater Level Trends***

***Groundwater Storage***

### Groundwater Budget (Type B)

The estimate of groundwater extraction is based on a 1993 survey conducted by the California Department of Water Resources. The survey included land use and sources of water. Groundwater extraction for municipal/industrial use is estimated to be 2 acre-feet. Deep percolation of applied water is estimated to be 1 acre-foot.

### Groundwater Quality

#### Well Characteristics

Well yields (gal/min)	
Municipal/Irrigation	NKD
Total depths (ft)	
Domestic	NKD
Municipal/Irrigation	NKD

NKD – No known data

#### Active Monitoring Data

Agency	Parameter	Number of wells /measurement frequency
	Groundwater levels	NKD
	Miscellaneous water quality	NKD

NKD – No Known Data

## Basin Management

---

Groundwater management:	Colusa County adopted a groundwater management ordinance in 1998.
Water agencies	
Public	None
Private	None

---
