

Lee Flat Groundwater Basin

- Groundwater Basin Number: 6-66
- County: Inyo
- Surface Area: 20,300 acres (31.7 square miles)

Basin Boundaries and Hydrology

This groundwater basin underlies Lee Flat, a northwest trending valley in central Inyo County. The basin is bounded on the north by the Nelson Range, on the west by the Inyo Mountains, on the south by the Santa Rosa Hills, and on the east by the Argus Range (Jennings 1958). Surface water is drained southwestward in Lee Wash (Jennings 1958). Annual precipitation varies across the basin and averages from 6 to 8 inches.

Hydrogeologic Information

Water Bearing Formations

Groundwater can likely be found in alluvium of Quaternary age. Alluvium typically consists of unconsolidated, fine- to coarse-grained sand, pebbles, and boulders with variable amounts of silt and clay.

Restrictive Structures

Unknown.

Recharge Areas

The principal source of recharge to the basin is likely percolation of runoff from surrounding mountains, with minor contribution from percolation of precipitation to the valley floor.

Groundwater Level Trends

No wells are known to exist in this basin.

Groundwater Storage

Groundwater Storage Capacity. Unknown.

Groundwater in Storage. Unknown.

Groundwater Budget (Type C)

No information is available.

Groundwater Quality

Characterization. Unknown.

Impairments. Unknown.
